OF SRI LANKA

The Institute of Chartered Professional Managers (CPM) of Sri Lanka concluded the 10th CPM Sri Lanka International Management Conference 2023 on 16th March 2023 at the Galadhari Hotel. The conference's theme was **Rebooting Management: Reimagine and Redesign**. The 2023 Conference intends to explore this domain. It invites us to reboot the management practices and move towards reimagining and redesigning for better outputs and outcomes.

The conference was organized physically, and it was full house participation. Founder and President of CPM Sri Lanka, Prof. Lakshman R. Watawala, gave opening remarks. Specialist in behavioural science and currently working as Professor in the Organizational Behaviour area at IIM Ahmedabad, India, Prof. Neharika Vohra presented her keynote address on 'Courageous Organizations: The Role of the Leader and the Team in Creating Psychological Safety'. The Chief Guest was Hon. Karu Jayasuriya, Patron of CPM Sri Lanka and Former Speaker of Parliament of Sri Lanka. Dr. Samantha Rathnayake, a governing council member of CPM Sri Lanka, and a Senior

Management Consultant from the Postgraduate Institute of Management of the University of Sri Jayewardenepura, Sri Lanka, played the head of technical design at the conference and made the closing remarks.

Management is an efficient, down-to-earth activity. There are no profound truths about it to be discovered, and there are no hidden secrets to be uncovered about how to do it. Management is a simple activity involving people and resources to produce goods or services. It is multidimensional, dynamic, and intangible. Effective organizations can withstand change disturbance and disruption and have the ability, capacity, and competence to face disruption. The message of the CPM Sri Lanka is always to alert members and Corporate Bodies to the need for the latest cutting-edge, advanced revolutionary thinking in management. People and companies are subject to continuous change. Unless managers learn to meet change and harness it for the good of the house in general and productivity, they will be fighting a losing battle.

Organizations are compelled to get ready for continuous change. This requires shifting focus away from rigid operational systems, processes, and practices that were built for long periods of relative stability. Leaders and managers have an implicit responsibility to radically change their management style in line with changing demands. It is not the case in every institution. To make a lasting change we must properly prepare before rebooting our management style. Do you ever wish management practice had a reboot button like a computer where you can shut it down and restart it if something goes wrong? Rebooting our practice, similarly, does not mean closing the door on our practice or selling it and moving to a new domain just to get a change. This thought may have crossed our minds from time to time, and some practitioners have gone ahead and done just that. Instead of a complete “restart” reboot, maybe what you are looking for is a “revive or give fresh impetus” type of reboot.

Session one focused on rebooting and reimagining of Government and Public Sector, Business, and Strategy. This theme is examined in line with state sector practices and outcomes and macro-economic perspectives and navigating the political and economic revival process. Adopting effective business and strategic practices to Sri Lankan organizations. The session was Chaired and Moderated by Ms. Gayani Punchihewa, Head of Marketing, Digital & Integrated Media of Wijeya Newspapers Ltd. One speaker was Dr. P.G.K. Harischandra, Director of the Economic Research Department at Central Bank of Sri Lanka delivered key insights into reboot and reimagining of Government and Public Sector; Macro Economic Perspectives whereas the other speaker was Mr.

Hikaam Khalid, Vice President/Head of Freight Forwarding Saudi Arabia who covered reboot and reimagine Business and Strategic Thinking. Panellists were Mr. Asanga Ranasinghe, Chairman, Sri Lanka Standard Institution, and Mr. Nalin Edirisinghe, CEO Designate, Pan Asia Banking Corporation PLC.

The post-lunch session concentrated on rebooting and redesigning Small and Medium Enterprises, Entrepreneurship, and Corporate Thinking. Area cover on reviewing SME interventions and strengthening entrepreneurship and intrapreneurship. Synergizing the novel ways of thinking and applications in corporate thinking to run effective institutions. Dr. Ravi Bamunusinghe, Chairman of SLSME and Visiting Faculty of PIM, University of Sri Jayewardenepura chaired and moderated the session. Panellists were Food Science and Quality expert Dr. Winston Liyanaarachchi, Director, Nutrinnovate Australia; entrepreneur and corporate personality Mr. Mithila Wegapitiya, Director/Chief Marketing Officer, POTENZA ANZ, New Zealand, Executive Director-People & Brand at LAUGFS Holdings Pvt Ltd; digital payment expert Ms. Mahesha Amarasuriya, Director- Account Management, Mastercard Sri Lanka. Also, Prof. Neharika Vohra who was the keynote speaker joined the panel discussion and added a lot of colour.

As a part of the conference, five best management practices company awards top five selected presentations chosen from 2023 awardees were showcased. Presentations were made by the senior representatives of Ansel Lanka, Elpitiya Plantations, DFCC Bank, LOLC Finance, and 99X company. This session was facilitated by the Chairman of the panel of judges of the CPM Best Management Company Awards 2023 competition.

In parallel to the conference, the “Best Management Practices Company Awards 2023” was organized by the CPM Sri Lanka recognizing Sri Lankan public and private sector Companies/ Institutions for their organizational growth and success. The awards endorsed the best practices in the Management of Companies during 2022 while recognizing their leadership, policies, and strategies, people management, partnerships & resources, processes, and performances. The awards provided a distinct framework for management teams to revisit and challenge themselves against their respective companies/institutions. The awards will give confidence to winning companies/institutions

to proudly make a professional appearance in business society and across the world. This is an invitation for other companies to come forward for writing a new management story next time. Sri Lankan companies were recognized under special recognition, best management practices, excellence in best management practices categories, and finally, overall gold, silver, and bronze winners selected by a technical judging panel of judges. At the end of the awards night, Mr. Dishan Arsakularathna, Director CPM Sri Lanka proposed the vote of thanks.

Chartered Manager July 2023

The latest issue of "Chartered Manager", the official journal of the Institute of Chartered Professional Managers of Sri Lanka, discusses **CROSSROADS FOR SRI LANKA; A CHALLENGE ACCEPTED, IS ENTREPRENEURSHIP THE REMEDY?**

Even before the ravages of covid were surmounted a dire political crisis hit the country. It was in the making for some time, and it has led to a severe economic crisis of major proportions leaving the country near bankruptcy. When every professional organisation is seeking answers, the country is also looking towards financial assistance to mitigate the issues. Everyone is aware that such measures will be short-lived. A permanent solution will rest rather on a home-grown response.

CPM Sri Lanka Institute too has taken these warning signs very seriously and has dedicated the current journal for experts to discuss publicly the issues and prescribe solutions in the hope

that the Government will take note. CPM is of the view that a possible answer may lie in encouraging entrepreneurship as a means of production. Entrepreneurship basically is about seeking original paths to create new businesses. It involves risk but if successful, will bring rich rewards. They may create new products and services or help change the way consumers behave. Either way, novel methods, and products will ensure rich rewards for the country.

CPM Sri Lanka asked several entrepreneurs with practical knowledge to discuss how they set about their journey, whether they are successful, and how Sri Lanka could find answers to ease the current situation.
